

ENERGISE

EUROPEAN NETWORK FOR RESEARCH, GOOD PRACTICE
AND INNOVATION FOR SUSTAINABLE ENERGY 

WHAT IS ENERGISE?

ENERGISE is an innovative pan-European research initiative to achieve a greater scientific understanding of the social and cultural influences on energy consumption.

ENERGISE develops, tests and assesses options aimed at transforming the quality and quantity of energy use among households and communities across Europe.

www.energise-project.eu

This project has received funding from the European Union's Horizon 2020 Research and Innovation programme under Grant Agreement No 727642.

THE ENERGISE PROJECT AIMS TO:

- 1 Develop an innovative framework** to evaluate energy initiatives, taking into account existing social practices and cultures which affect energy consumption.
- 2 Assess and compare the impact** of European energy consumption reduction initiatives.
- 3 Advance the use of Living Lab approaches** for researching and transforming energy cultures.
- 4 Produce new research-led insights** into the role of household routines and changes to those routines towards more sustainable energy.
- 5 Encourage positive interaction** between actors from society, the policy arena and industry.
- 6 Effectively transfer** project outputs towards the implementation of the European Energy Union.

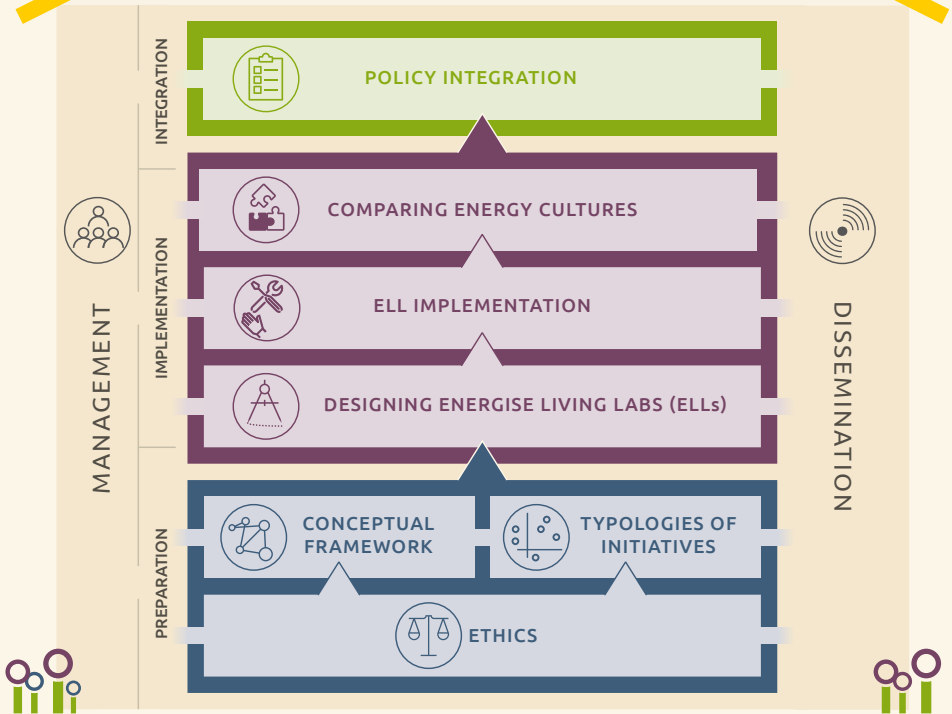

HOW THE ENERGISE CONSORTIUM WILL ACHIEVE THESE AIMS

ENERGISE develops a Living Labs approach to directly observe existing energy cultures and social practices related to energy consumption in a real-world setting and to test both household and community-level initiatives to reduce energy consumption. A comprehensive review and classification of household and community energy initiatives from **30 European countries** provides the foundation for the development of two prototype '**ENERGISE Living Labs**' designed to address the dynamics of individual and collective energy consumption. Data collection before, during and after the implementation of **16 Living Labs in 8 partner countries** will be instrumental in contributing to the design and assessment of future energy consumption initiatives across Europe.

ENERGISE AT A GLANCE

ENERGISE

WHO WE ARE

The **ENERGISE** consortium includes ten research partners (universities, research institutes, enterprises and NGOs) from **Bulgaria, Denmark, Finland, Germany, Hungary, Ireland, Slovenia, Switzerland, the Netherlands** and the **United Kingdom**.
